SOURCE

1. Lt.Col.Nikola SKORO was commandant of the KARLOVAC (Y 12/K 25) engineer officer school in mid-May 1949.
2. Regular and reserve officers were trained at the school; the former for three consecutive years, the latter in six-month courses conducted in the summer and fall of each year. Regular officers attended separate courses on their engineer specialty during the first two years. The courses were combined in one class the third year. About two hundred officers were in the third year of training at the time of observation. The officers graduated from the school after three-months maneuvers near BRCD (Y 5/G 12) on the Sava River.
3. Engineer equipment of German and Soviet origin was used at the school.
4. Engineer exercises were conducted on the Danube, Sava, Kupa and Karana Rivers. Exercises on the Drava River have been discontinued following the aggravation of the political tensions between Yugoslavia and the Cominform countries.
